

The Federal Communications Commission

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

When does it stop? The burden of EVERYTHING IS ALWAYS on the consumer. The real tax breaks go to business, now this. Keep it up and you will kill the golden goose. It won't take much more...The massive debt load of consumers, the tax breaks for only the wealthy. A lot of us are just getting fed up with politics as usual. Don't forget, the last election was 51% of 60%. Only about 30% of the population voted the winning ticket. That won't last forever...

Keep the USF Fair!

Sincerely,

Larry Stuart
